

Course Module: AI in BPO Operation (AIBPO)

Course Type: Mid-Level Skills Course

Duration

- 2 months (44 days, 5 hours per day, total 220 hours)

Targeted Trainees (ITES/BPO Sector of Bangladesh)

- Mid-level operations staff and automation leads in BPO service delivery
- Customer experience associates and team leaders exploring AI adoption
- Analysts, quality evaluators, or MIS professionals integrating AI into workflows
- Digital upskilling candidates focused on GenAI and intelligent automation

Benefits of the Course for the ITES/BPO Sector of Bangladesh

- Equips BPO talent with practical knowledge of **AI tools for service automation, insights, and optimization**
- Supports Bangladesh’s leap toward **intelligent outsourcing**, adding value to global delivery hubs
- Boosts speed, personalization, and quality in customer interactions and back-office efficiency
- Fosters a future-ready workforce capable of **collaborating with AI rather than competing against it**
- Helps local BPOs pitch smarter, scalable solutions using GenAI, RPA, and NLP capabilities

Course Outline

Week	Module Name	Sub-Modules / Topics
1	Evolution of AI in Global BPO	What is AI in outsourcing? · History of automation in BPO · Types of AI used in service sectors
2	Generative AI for Communication & Support	ChatGPT, Gemini, Copilot use cases · Email drafting · FAQs & response generation · Personalization without hallucination
3	Process Automation with AI	Introduction to RPA · Identifying repetitive tasks · Building efficiency through bots · Business rules automation
4	Natural Language Processing in Service Delivery	Sentiment analysis · Intent detection · Language translation · Smart escalation triggers

Week	Module Name	Sub-Modules / Topics
5	AI-Powered Customer Interaction	AI agents · Intelligent IVRs · AI for self-service portals · Balancing human-AI support
6	AI in Data Analytics and Reporting	Pattern detection · Forecasting support tickets · Process benchmarking using AI
7	AI for Quality & Compliance	AI in monitoring interactions · Policy violation detection · Auto-QA scoring
8	Human-AI Collaboration & Role Reframing	Augmented service models · Building trust in AI outputs · Skills needed in an AI-enhanced BPO landscape
9	Risk, Ethics, and AI Governance in BPOs	AI bias · Data privacy and compliance (GDPR, DPD) · Guardrails & explainability in automation
10	Capstone: BPO Process Optimization with AI	Team simulation – Design an AI-enabled BPO workflow · Present ROI & process map · Peer feedback + instructor review

Tools That May Be Used in the Course

- **Generative AI:** ChatGPT, Microsoft Copilot, Notion AI
- **Automation Platforms:** UiPath (demo), Zapier, Power Automate
- **NLP & AI APIs:** Google Cloud Natural Language, Azure Text Analytics
- **Customer Experience Tools:** Freshdesk AI, Zendesk AI, Dialpad AI
- **Analytics & QA:** Power BI, Google Data Studio, Observe.AI (demo), Scorebuddy

Deliverables of the Course

- Certification: “AI-Enabled BPO Innovator”
- Weekly Assignments: Prompt design, workflow mapping, AI QA simulation
- Capstone Submission: AI-transformed BPO process deck with KPI improvements
- AI Adoption Toolkit: SOP samples, risk templates, prompt libraries
- Peer Review + Instructor Evaluation on usability, scalability, and ethical alignment
